

Runway Closes Temporarily

7:09 p.m. Wednesday, June 28, 2023

The aircraft has been removed from Runway 18R/36L and the inspection is complete. The runway is now open. Please continue to check with your airline on updated flight status.

6:37 p.m. Wednesday, June 28, 2023

Crews are in the process of removing the aircraft from the runway, after which an inspection will take place. Please continue to check with your airline on updated flight status.

1:44 p.m. Wednesday, June 28, 2023

The runway remains closed. The airlines continue to experience some delays. We are ready to assist our federal and airline partners in removing the aircraft and reopening the runway when we are given the official word. We are asking customers to check with their airline for an updated status of their flight before coming to the Airport.

10:20 a.m. Wednesday, June 28, 2023

At approximately 8:40 a.m. Delta Air Lines Flight 1092 landed in Charlotte on Runway 36 Left. The aircraft remains on the runway due to mechanical issues. The runway is closed and Airport is working to remove the aircraft. There were no injuries reported, and passengers were bussed to the terminal. We are anticipating operational impacts due to the runway closure. Passengers should check flight status with their [airlines](#). Follow @CLTAirport on [Facebook](#) and [Twitter](#) for updates.
